

THE MT. GLENWOOD CHAUTAUQUA ASSOCIATION.

By Mildred Miller.

Of the many and varied enterprises launched forth by Negroes to be supported by Negroes now and then there is one that is truly worth while and that should be seriously considered.

The Mount Glenwood Chautauqua Association, recently incorporate, and under excellent management, is an enterprise that should appeal to every thoughtful man and woman of Chicago.

In the first place their beautiful grounds are so near that even the poorest can spend a few days there. In the next place, intelligent citizens make the best citizens and the lectures promised will help busy men and women to know more of the great country in which we live and make them understand and appreciate the beautiful in nature about them.

Finally, it is time for our young people to have such opportunities for recreation and at the same time receive the educational, moral, religious and ethical culture provided by chautauqua meetings.

If the two weeks' meeting planned for next August by the association is not well attended and properly supported, shame on the progressive (?) Chicago Negro.

And if the leaders and lights of the race cannot stop "resoluting" on southern lynchings and grumbling over social and political grievances in Chicago long enough to see something for uplift in a chautauqua gathering, let us have no leaders and let the lights be turned off forever.
